

PERSONAL REMARKS

I would like to sincerely thank the following people:

- Mr Pieter Basson for patiently and gently guiding me through this research and dissertation and in the process becoming a friend.
- My family – Mom, Dad, Debbie, Tammy and Colin – who were always there supporting me whenever I needed them to be. A special thank you especially to my mom who never complained when I needed to commandeer her computer.
- My friends – especially Sjane, Riaan, Vanishree and Erica who kept on reminding me that what I was doing was worthwhile.
- The Statistical Department of the Rand Afrikaans University particularly Riette Eiselen for all her help regarding the analysis of my data.
- Jawitz Properties - particularly Herschel Jawitz – for their support and interest in my study.
- All the participants – especially Hilton - without whom this research would not have been completed.
