

Figure 1.2:

Map of the Farm gotha showing the major fault lines, aerial photograph lineations, mapped outcrop points and interpreted extent of the outcrops. Also shown are structural measurements, GPS tracking points showing the traverse routes and a 1kmx1km grid.

Figure 1.3:

Combined geological map of area surrounding the Venetia kimberlite pipes including the Farm Gotha (published previously in Barton et al., 2003; Doorgapershad et al., 2003) incorporating data presented in Martin (2002), Mellonig (2004), Twiggs (2004) and Zenglein (2004).
