

Taylor & Francis's position on Copyright and Author Rights

Introduction

For over two hundred years, Taylor & Francis have sought to achieve the widest dissemination of new research knowledge via our scholarly journals. We continue to support the widest possible access to the scientific, scholarly and medical literature through innovative and creative publishing policy and practice, founded on the highest standards of peer review.

Taylor & Francis, and the scholarly and professional associations with whom we work, are committed to good stewardship of the scholarly record, and to managing authors' Intellectual Property Rights (IPR) as these are associated with their article. Such articles are normally the primary written report of the results of a scientific research project. Such research may be supported by funding from Government or commercial sources. It may be conducted by a single research group from a single institution, or may be the outcome of collaborative working between institutions on a global scale. Such research in its written form, has been submitted for consideration to a Taylor & Francis journal, and is then subject to that journal's rigorous peer review. If acceptable after revision in the light of referees' comments, then that research is published in its final and definitive form, for the first time, by Taylor & Francis in a Taylor & Francis journal, or in a journal published by Taylor & Francis on behalf of a scholarly or professional association.

This is the version of scholarly record, and in its online form will be fully reference-linked. Taylor & Francis has added value to this version – editing to a style consistent with linking conventions, converting to a suitable digital form, putting in the digital reference links and meta-tags for feeds to abstracting and indexing services, registering the digital object identifier (DOI), and monitoring electronic usage.

In all our activities, we are working for the benefit of authors to ensure maximum access to and use of their articles, and to ensure that authors may gain from the goodwill associated with publishing in a Taylor & Francis journal. Yet we are also seeking to enhance the reputation and prestige of the Journal, its editors and editorial board, its peer review processes, and the added value brought by the journal and its publisher.

Definition of terms

'First publication' is taken to mean 'first' publication in a recognised Taylor & Francis journal (in electronic and paper editions) of an original article that has been through a rigorous and equitable 'peer review' process, as opposed to any subsequent publication in a secondary medium.

‘Exclusive publishing right’ is taken to mean the exclusive right (with the exception of an agreed version of an article that an Author may place on a website or in an open archive repository) to reproduce and communicate to the public the whole or any part of an article, and to publish the same throughout the world in any format and in all languages for the full term of copyright. This includes without limitation the right to publish an article in printed form, electronic form, other data storage media, transmission over the Internet and other communication networks and in any other electronic form, and to authorise others to do the same.

Assign copyright, or license publication right?

.

We prefer authors to assign copyright to Taylor & Francis or the journal proprietor (such as a learned society on whose behalf we publish), but accept that authors may prefer to give Taylor & Francis an exclusive licence to publish. Copyright assignment has the advantage of elimination of ambiguity, for example in negotiating subsidiary licences (for instance with database aggregators) or in dealing on an Author’s behalf with plagiarism, abuse of moral rights, protecting intellectual property or copyright infringement.

It is important however that we are at least granted exclusive rights because of the needs of the scholarly community for certainty in the scientific record. There is a requirement for a clear and unambiguous record of the scholarly or scientific process, with validated authentication of the final version of an article which has been edited, peer-reviewed and accepted in a journal which confers a recognized, legitimate status on an article. For these reasons we need these rights to assure the scholarly community that they are reading the genuine, final version.

Taylor & Francis’ duties as a Publisher

We agree:

1. to defend your Article against plagiarism and copyright infringement, and to that end, Taylor & Francis shall take all reasonable steps to act against unauthorised replication of an article in part or in whole;
2. to receive and to administer permissions and deal with licensing issues relating to an article;
3. to maintain the integrity of an article such that it becomes ‘the sworn statement of science’, that is a definitive, citeable, permanent, and secure record of an article, accessible in perpetuity;
4. to ensure that the published version of an article carries an appropriate level of metadata tagging to facilitate discovery and logging by search engines;
5. to ensure the safe archiving of an article and as required to ensure that a copy is deposited in any national archive deriving from the Legal Deposit Libraries Act 2003.
6. to supply definitive information on how to cite your article in both print and online formats.

The rights that you retain as Author

In assigning Taylor & Francis or the journal proprietor copyright, or granting an exclusive licence to publish, you retain:

1. the right to be identified as the Author of an article whenever and wherever the Article is published;
2. patent rights, trademark rights, or rights to any process, product or procedure described in an article;
3. the right to share with colleagues print or electronic 'preprints' (i.e., versions of the article created prior to peer review) of an unpublished Article, perhaps in the form and content as submitted for publication;
4. always providing that the editorial policy of the journal concerned allows this within its policies on prior publication, the right to post such a 'preprint' on your own website, or on your institution's intranet, or within the Institutional Repository of your institution or company of employment, on the following condition, and with the following acknowledgement:

This is a preprint of an article submitted for consideration in the [JOURNAL TITLE] © [year of publication] [copyright Taylor & Francis]; [JOURNAL TITLE] is available online at: <http://www.informaworld.com> with the open URL of your article, which would be the following address;

[http://www.informaworld.com/openurl?genre=article&issn=\[paper issn\]&volume=\[volume number\]&issue=\[issue number\]&spage=\[starting page of article\]](http://www.informaworld.com/openurl?genre=article&issn=[paper issn]&volume=[volume number]&issue=[issue number]&spage=[starting page of article])

Where the paper issn is in format of xxxx-xxxx. An example of this is:

<http://www.informaworld.com/openurl?genre=article&issn=0143-1161&volume=27&issue=7&spage=1279>;

5. the right to retain a preprint version of the Article as specified above following publication in a Taylor & Francis journal, on the following condition, and with the following acknowledgement:

This is a preprint of an article whose final and definitive form has been published in the [JOURNAL TITLE] © [year of publication] [copyright Taylor & Francis]; [JOURNAL TITLE] is available online at: <http://www.informaworld.com> with the open URL of your article (see point 4 for open URL details);

6. the right to post your revised text version of the 'postprint' of the Article (i.e., the Article in the form accepted for publication in a Taylor & Francis journal following the process of peer review), after an embargo period commencing 12 months (STM) or 18 months (SSH) after first publication (either in print or online), as an electronic file on an Author's own website for personal or professional use, or on an Author's internal university, college, or corporate network or intranet, or within an Institutional or Subject Repository, but not for commercial sale or for any systematic external distribution by a third party (for example a listserv or database connected to a public access server) subject to the following

acknowledgement:

'This is an electronic version of an article published in [include the complete citation information for the final version of the article as published in the print edition of the journal]. [JOURNAL TITLE] is available online at: <http://www.informaworld.com> with the open URL of your article (see point 4 for open URL details).

For the avoidance of doubt, 'your version' is the author version and not the publisher-created PDF, HTML or XML version posted as the definitive, final version of scientific record.

7. the right to share with colleagues (but not on a commercial or systematic basis) copies of an article in its published form as supplied by Taylor & Francis as an electronic or printed offprint or reprint;
8. the right to make printed copies of all or part of an article for use for lecture or classroom purposes provided that such copies are not offered for sale or distributed in any systematic way, and provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit. For the avoidance of doubt, authors may use the publisher-supplied PDF version in teaching and for coursepacks, within their own institution, so long as they are distributed free of charge and not sold to students, in which case we would require permission to be sought. In addition, authors may also use the publisher-supplied PDF for posting in e-reserves, so long as it is also only within the author's institution. We allow this on the basis of the AAP/Cornell agreement: <http://pressoffice.cornell.edu/Sept06/AAPCopyright.shtml>
9. the right to facilitate the distribution of the Article if the Article has been produced within the scope of an Author's employment, so that the Author's employer may use all or part of the Article internally within the institution or company provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit;
10. the right to include an article in a thesis or dissertation that is not to be published commercially, provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit;
11. the right to present an article at a meeting or conference and to distribute printed copies of the Article to the delegates attending the meeting provided that this is not for commercial purposes and provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit;
12. the right to use the Article in its published form in whole or in part without revision or modification in personal compilations [in print or electronic form] or other publications of an Author's own articles, provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit;
13. The right to expand an article into book-length form for publication provided that acknowledgement to prior publication in the relevant Taylor & Francis journal is made explicit.

The following exclusions require you to obtain written permission from Taylor & Francis:

1. inclusion of an article in a course pack for onward sale by a third party e.g. the library of an Author's institution;
2. distribution in print or electronic form by any third party such as a website, listserv, content aggregator, or conference organiser, with the exceptions specified above;
3. distribution in print or electronic form to the commercial benefit of an Author, an Author's institution or employer, or a third party.

Retrospective coverage

We are happy to extend all these provisions to the many thousands of authors who have signed copyright assignments and licences to publish in the past with Taylor & Francis or one of its constituent imprints, without the need to seek amendment to the previous agreements.

Note

If an Author is a UK Crown servant and an article is made in that capacity, an article must be submitted for clearance by the Permanent Head of the Department concerned. If an Author is a US Government employee and an article is made in that capacity, assignment applies only to the extent allowable by US law. In either case it is the responsibility of an Author to make the necessary enquiries and arrangements.
