## ACKNOWLEDGEMENTS

---

My studies at the Rand Afrikaans University would not have been possible without the help and guidance of all the lectures and staff in the Department of Geology. In particular, my supervisors: Prof. Nic Beukes and Prof. Jens Gutzmer, who guided me and greatly contributed to my thesis. Continued support, also, from all the staff including, Prof. Bruce Caincross, Jan-Marten Huizenga, Joydip Mukhopadhyay, as well as my fellow post-graduate students.

I also wish to thank my family, who offered continued support and motivation during my studies, and in particular my father who provided all the financial support. Acknowledgement and thanks also to my girlfriend, Annelyze, who has always been there for me.
