

Acknowledgements

Most importantly I thank God for all that he has given me.

I thank my parents for all they have done for me throughout my academic career and for all their love, support and motivation.

I thank my wife Bernette, for her love, support and motivation throughout my studies.

To my sister Cheryl, thank you for your help with the typing.

I thank Prof. C. A. Smit and Prof. D.D. van Reenen for all their help throughout my studies and for critically reviewing this work.

I thank Dr. Vasily. O. Yapaskurt from Moscow State University his friendship and all his assistance with the SEM and microprobe work.

I thank Prof. L.L. Perchuk, his guidance with the conducted light microscope work, thermobarometry and with selecting areas to probe within the samples.

I thank Dr. K. Hisada and his wife for showing me how to prepare my own thin sections.

I thank Dr. T.V. Gerya his help with the thermobarometry work.

Lastly I thank all the other people that helped me in some way to finally finishing this dissertation.
