

INVITATION

The Departments of Politics and International Relations, Sociology, Anthropology & Development Studies and Library and Information Centre present a Seminar on

State Capture, White Monopoly Capital and Radical Economic Transformation: The Balance of Forces

'State Capture' has become a household concept in South Africa; short-handed for many of the ills that have beset the political terrain. What is 'State Capture'? Who is doing the capturing? How? What are the short and long-term consequences? How can it be challenged? Where does radical economic transformation fit into the equation? What role can intellectuals play in this contest of social forces?
