

LIST OF TABLES

Table 4-1: Definitions and components of direct, indirect and cumulative effects	12
Table 4-2: Duration of impact	14
Table 4-3: Extent of impact	15
Table 4-4: Probability of impact	15
Table 4-5: Significance of impact	16
Table 4-6: Summary of published methodologies	20
Table 5-1: A provisional three class system for determining the degree of wetness of wetland soils based on soil morphology	36
Table 6-1: South African Ramsar wetlands of international importance	50
Table 9-1: Impact assessment of the various features throughout the project lifetime	69
Table 9-2: An example of the cumulative impacts of mining on a wetland assessed quantitatively	72
Table 9-3: An example of the cumulative impacts of the genetic resource of a wetland plant assessed qualitatively	73

LIST OF FIGURES

Figure 5-1: South African wetland classification system, to class level excluding marine estuarine wetlands	29
Figure 9-1: Conceptual model for combining primary methods into a cumulative impact assessment	75
