

## ACKNOWLEDGEMENTS

I would like to acknowledge the following people and organizations for their respective contributions:

- First and foremost I would like to thank my supervisors Dr. J.M. Huizenga, Prof. Nic Beukes and Prof. J. Gutzmer for their guidance, inspiration and incredible patience for the duration of this project. Many thanks to Dr C. A. Smit for his contributions in the structural chapter. Without their continued support in every respect, it is doubtful that this thesis would have been completed within a period of one year. Thank you Prof. Nic for giving me the "once in a lifetime" opportunity of traveling to part of West Africa, it was really a fantastic experience.
- My parents and brother for their whole-hearted support throughout this project, and for encouragement when things got a bit tough.
- All other postgraduate students at the RAU Geology Department for all the laughs (every day) and for the mutual support rendered by everyone.
- Goldfields Ltd. for allowing me to extend my bursary obligation with them in order to register for an MSc. degree.
- Chris and Daniela Masurenko for their friendliness and hospitality and for making my stay at Nsuta a comfortable, pleasureable and unforgettable experience.
- BHP Minerals (South Africa) for provision of geophysical data of the Ashanti Belt.
- The NRF and Ghana Manganese Company Ltd for financial support.
- Emanuel Atta Gyamfi for being an incredibly keen and dedicated field assistant.
