

Acknowledgments:

I would like to extend my gratitude to the many people who were involved in seeing this study to its completion:

- To the academics, prof. Jan A. du Randt (promoter) and prof. Gert Steyn who were more like friends than tutors. They were a blessing and a guidance in the dark times of this study.
- To prof. Stephan Joubert, for whom I have the greatest respect, who participated as an examiner.
- To the Rand Afrikaans University for the opportunity to do my doctoral studies at their campus.
- To the Dutch Reformed congregation of Alberton-South. They need to be placed on the highest pedestal for their patience during my absence and for their moral support when I was amongst them. They not only supported me financially, but also created a platform for me to experiment with art, movie and sound within worship services.
- To Ronél Ferreira whose editorial work is to be envied.
- To my family without whom, life for me would be a pauper's struggle. The love and support of my wife, Marietjie, and the pleasure of having my children Hanli and Enric with me truly made me rich. Their presence would give any poor soul the heart of a lion.
