

**Responses in barley gene expression after
pathogen infection**

by

Nelanie Bezuidenhout

DISSERTATION

submitted in fulfillment of the requirements for the degree

MASTER OF SCIENCE

in

Botany and Plant Biotechnology

in the

UNIVERSITY OF JOHANNESBURG

FACULTY OF SCIENCE

at the

UNIVERSITY OF JOHANNESBURG

Supervisor: Dr E Venter

Co-Supervisor: Prof A-M Oberholster

JANUARY 2008

Table of contents

Acknowledgement -----	iv
List of Figures -----	v
List of Tables -----	vii
Abbreviations -----	viii
Chapter 1: Introduction -----	2
Chapter 2: Literature review	
1. Description of barley -----	5
2. Plant pathogens -----	6
2.1 <i>F. graminearum</i> -----	8
3. Plant defences -----	10
3.1 The “Gene-for-Gene” concept -----	12
3.2 Guard hypothesis -----	13
3.3 Hypersensitive response -----	14
3.4 Resistance genes -----	15
3.5 Classes of R proteins -----	17
3.6 Elicitors -----	18
3.7 Signal transduction in plants -----	18
3.7.1 Oxidative burst -----	18
3.7.2. Ion fluxes -----	19
3.7.3 Phytoalexins -----	21
3.7.4 The role of plant hormones -----	22
3.7.4.1 Salicylic acid -----	22
3.7.4.2 Jasmonate and ethylene -----	23
3.7.5 Pathogenesis-related proteins -----	24
4. Plant-pathogen interaction -----	27
4.1 The interaction between barley and <i>Blumeria graminis</i> -----	27
4.2 The interaction between barley and <i>F. graminearum</i> -----	30
4.3 Host resistance -----	31
5. Conclusion -----	36
Chapter 3: Materials and methods	
1. Barley plant material -----	39
2. Fungal isolates -----	39
3. Fungal infection -----	39
4. General techniques -----	40
4.1 Total RNA extractions -----	40
4.2 Agarose gel electrophoresis -----	41
4.3 Messenger RNA (mRNA) extraction from total RNA -----	41
4.4 Complementary DNA (cDNA) synthesis -----	42
4.4.1 First strand cDNA synthesis -----	42
4.4.2 Second strand cDNA synthesis -----	42
4.5 cDNA purification -----	42
5. Suppression subtractive hybridisation (SSH) -----	43
5.1 RsaI digest -----	43
5.2 Southern Blot -----	43
5.3 Ligation -----	44

5.4 Hybridisation-----	44
5.4.1 First hybridisation -----	44
5.4.2. Second hybridisation -----	45
5.5 PCR amplification -----	45
5.6 Random primer-probes labelling -----	46
5.7 Determination of labelling efficiency-----	46
5.8 Determining efficiency of SSH with Southern Blot -----	46
5.9 Stripping and re-probing of DNA blots-----	47
6. Cloning of DNA into competent <i>Escherichia coli</i> cells -----	47
6.1 Plasmid preparations-----	47
6.2 Colony PCR-----	48
6.3 Purification of PCR products in micro plates-----	48
6.4 Cycle sequence PCR -----	48
6.5 Sequencing -----	49
7. Northern Blots -----	49
Chapter 4: Results -----	51
Chapter 5: Discussion -----	70
References -----	73
