

Acknowledgement

I would like to thank my Creator for allowing me to complete my dissertation, and especially for helping me during the difficult times.

I would also like to thank Prof. Olivier for guiding me throughout my dissertation, and for always making sure that he is available when we need assistance.

I would like to thank my family, especially my parents, for being so patient and encouraging, and my brother Peter for helping me to make the *right* grammar choice when both choices just seem to make sense!

I dedicate this dissertation to my late grandmother Nonna Luisa, who always encouraged me to continue studying and to have faith in God at all times.
